

Time Travelers is an historical slice of life, offering a sneak peek into the life and times of historical figures. With that in mind, we've created the anagram SLICE to help you remember these key features:

Sensory Today's research proves that kids learn in many different ways: Visual, Auditory, Tactile. Time Travelers: A Living History allows students to SEE, HEAR and INTERACT with powerful characters in a way that will stay with them a lifetime.

Live It's not a video, it's not electronic, digital or two-dimensional. It's a person – a living, breathing historical figure, standing in the classroom, talking about their life. These seasoned Travelers have great stories to tell and your child will hear them, first-person!

Intimate You don't need a large venue, such as an auditorium. Why? Because your Time Travelers come right into your child's classroom, making the visit personal, up-close and magical!

Cost Unlike expensive, elaborate productions, Time Travelers is designed to be completely volunteer; which translates into huge savings down the road. After the initial start-up, the program runs at little or no cost to your school for years to come.

Exciting Positive word-of-mouth via these testimonials has been overwhelming:
"Time Travelers is such a valuable program; easy to implement and integrates well with grade-level curriculum." "Dear Captain James Cook...thank you for visiting my class...I learned so much...keep exploring and tell your sailors to take a shower!" "I'm for any program that gives my kids more history!"
